Solving a linear inequality | Past Exam Question | C1 June 2014 Q3a

Find the set of values of x for which

$$3x - 7 > 3 - x \quad (2)$$

$$3x - 7 > 3 - x$$

$$\therefore 4x - 7 > 3$$

$$\therefore 4x > 10$$

$$\therefore x > \frac{10}{4}$$

$$\therefore x > 2\frac{1}{2}$$
